

AI Test Results from testers.ai

The HOME page of 'Perfect QA Services' exhibits a range of quality issues. Network resolution failures and 'Failed to fetch' errors impact performance and reliability. Furthermore, the presence of a React-18next deprecation warning indicates a need for library updates. Accessibility issues, such as missing alt text, low contrast text, and missing focus states, detract from usability for all users, and violate WCAG guidelines. Finally, functional issues like missing navigation menu items indicate some issues with core features.

| Best Aspects | Areas for Improvement |
|---|---|
| The app's focus on QA services has potential value for its target audience. | Network instability, accessibility violations, and the absence of a privacy policy significantly detract from the user experience and raise serious concerns. |

Quality Summary

View Data on [testers.ai](#)

Detailed Analysis

The 'Perfect QA Services' app's HOME page demonstrates some opportunities for improvement from a quality perspective. Several network-related bugs, including 'Network Resolution Failures' and 'Failed to fetch' errors, indicate performance bottlenecks or API connectivity problems that directly impact the user experience. The presence of a React-18next Deprecation Warning, while not immediately critical, suggests a need for proactive library updates to avoid future compatibility issues. Addressing the Missing Privacy Policy and User Consent Mechanism is not only a legal necessity (GDPR compliance) but also crucial for building user trust. Significant concerns surrounding accessibility are exposed with a variety of WCAG violations including Missing Alt Text for Images, Low Contrast Text, Missing Focus States, and Missing Skip Navigation Link. This demonstrates a clear gap in catering to users with disabilities. Also, small but irritating issues such as Truncated Text with Ellipses and the Incorrect Copyright Year contribute to an overall perception of a less polished and refined application. The presence of Redundant Site Assets Requests - Thunderbolt and Resource Loading Errors further exacerbates the performance issues, requiring focused optimization of asset delivery.

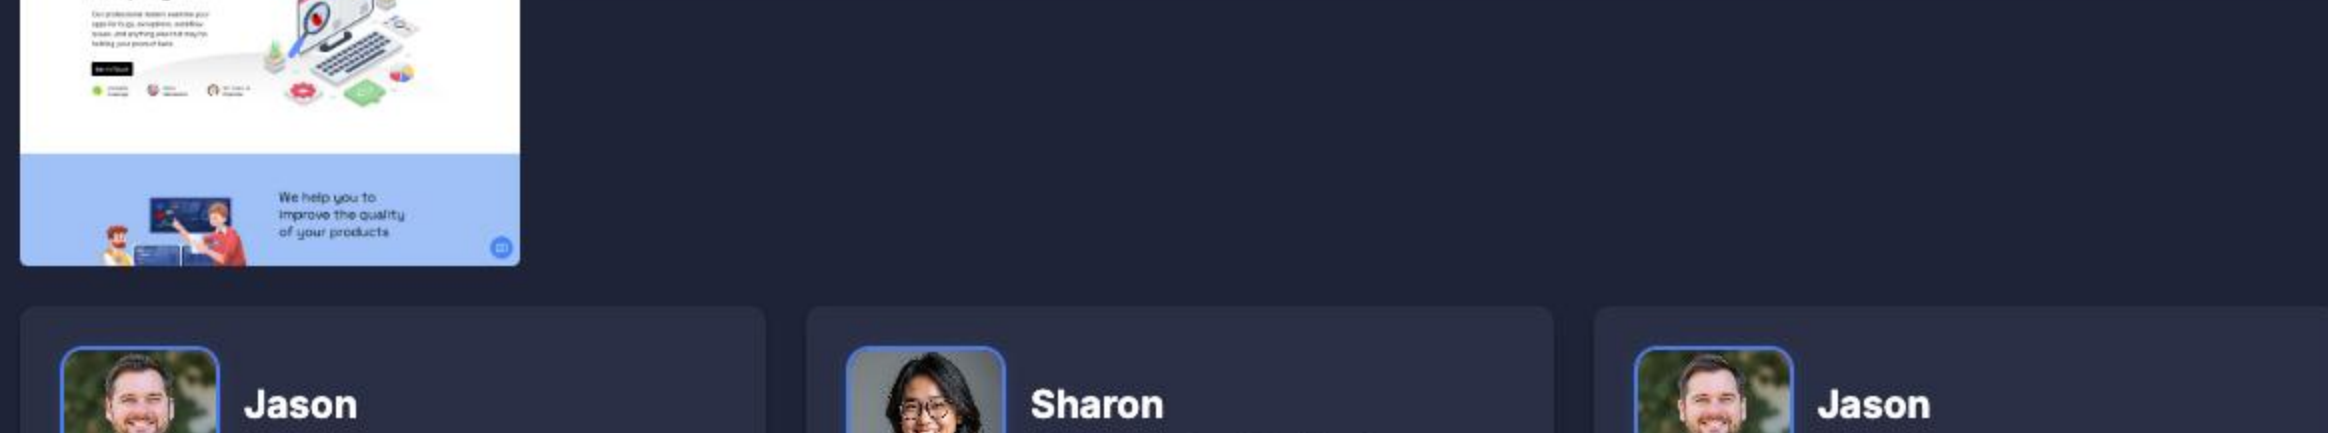

Key Suggestions

- Prioritize resolution of network connectivity issues and API errors.
- Conduct a thorough accessibility audit and implement necessary fixes.
- Implement a Privacy Policy and User Consent Mechanism to comply with GDPR and build user trust.
- Update outdated libraries and dependencies.
- Add comprehensive error handling and logging.

Priority Improvements

- Address 'Network Resolution Failures' and 'Failed to fetch' errors to improve performance and reliability by debugging network connectivity and improving error handling. Check the network status to see if its reliable and the issue is in the app, or outside the app.
- Update the React-18next library to resolve the deprecation warning and ensure compatibility.
- Implement missing alt text for images, address low contrast text, and add missing focus states to comply with WCAG guidelines and improve accessibility for all users. Prioritize the most visited pages first.
- Implement a Privacy Policy and User Consent Mechanism to comply with GDPR regulations.
- Fix Missing Navigation Menu Items

Issues Found by AI Testers

Network Resolution Failures

Priority: 7/10 Confidence: 8/10

network performance

Why is this a bug?

Multiple 'Failed to load resource: net:ERR_NAME_NOT_RESOLVED' errors indicate the browser is unable to resolve the domain names of required resources. This leads to broken functionality and degraded user experience.

Suggested Fix

Investigate DNS configuration. Ensure that all resources are correctly linked and that DNS records are properly configured. Monitor DNS resolution performance.

Why Fix This?

Unresolved resources lead to a broken user experience and potential loss of functionality. Addressing this is critical for ensuring site reliability.

Redundant Site Assets Requests - Thunderbolt

Priority: 7/10 Confidence: 8/10

performance network

Why is this a bug?

Multiple GET requests are made to 'siteassets.parastorage.com/pages/pages/thu' with nearly identical query parameters, differing only in 'pagelid' and 'fileid'. This indicates that the same base assets are being requested multiple times, which is inefficient and can slow down page load times. The timestamp for these requests are very similar, adding to the confidence.

Suggested Fix

Implement more granular caching strategies and investigate the asset management system to avoid redundant requests. Consider using a content delivery network (CDN) with optimized caching configurations to minimize redundant downloads.

Why Fix This?

Reducing redundant network requests will improve page load times, reduce server load, and enhance user experience.

'Failed to fetch' Errors

Priority: 7/10 Confidence: 7/10

network api

Why is this a bug?

The 'TypeError: Failed to fetch' errors suggest that the application is unable to make successful API calls. This could be due to network issues, incorrect API endpoints, CORS errors, or server-side problems. The stack trace points to a specific file related to clientWorker, indicating that some asynchronous operations may be failing.

Suggested Fix

Investigate the API endpoints being called and ensure they are correct. Check for CORS configuration errors. Implement proper error handling and retry mechanisms for API calls. Review the clientWorker code for any issues that could cause API calls to fail. Test on multiple client devices to rule out client-side issues.

Why Fix This?

Failed API calls result in broken functionality and a poor user experience. These errors need immediate attention to ensure that the application is functioning correctly.

Missing Alt Text for Images

Priority: 7/10 Confidence: 9/10

WCAG accessibility

Why is this a bug?

Several images on the page lack alt text, making them inaccessible to users who rely on screen readers. This violates WCAG guidelines for providing alternative text for non-text content.

Suggested Fix

Provide descriptive alt text for all images, ensuring the text is concise and informative about the image's content and purpose. If an image is purely decorative, use an empty alt attribute (alt="") to signal this to screen readers.

Why Fix This?

Providing alt text ensures that all users, including those with visual impairments, can access and understand the content of the page.

Missing Skip Navigation Link

Priority: 7/10 Confidence: 8/10

WCAG Keyboard Navigation

Why is this a bug?

The page lacks a skip navigation link, making it difficult for keyboard users and screen reader users to bypass the navigation menu and access the main content directly. This violates WCAG 2.4.1 (Bypass Blocks).

Suggested Fix

Implement a skip navigation link that allows users to bypass the navigation and jump directly to the main content area of the page.

Why Fix This?

Providing a skip navigation link is crucial for improving accessibility and usability for users who rely on keyboard navigation or screen readers.

Tester for Missing Aspects

Low Contrast Text

Priority: 7/10 Confidence: 9/10

WCAG Usability

Why is this a bug?

Some of the text on the page, particularly in the footer and sections with colored backgrounds, may not meet the minimum contrast ratios specified in WCAG guidelines (1.4.3 Contrast (Minimum)). Low contrast makes it difficult for users with visual impairments to read the text. Example: The contact information in the footer has low contrast.

Suggested Fix

Increase the contrast between the text and background colors for all text elements, especially in the footer and sections with colored backgrounds. Use a color contrast checker to ensure compliance with WCAG 2.1 AA standards.

Why Fix This?

Ensuring sufficient contrast improves readability for all users, including those with low vision, color blindness, or other visual impairments, leading to a more inclusive and accessible website.

Incorrect Copyright Year

Priority: 7/10 Confidence: 9/10

General Copyright

Why is this a bug?

The copyright notice at the bottom of the page shows '©2025 PerfectQA LLP'. This is incorrect because it's already April 2025 and the copyright should be updated.

Suggested Fix

Update the copyright notice to reflect the current year: ©2025 PerfectQA LLP | All Rights Reserved.

Why Fix This?

Ensuring the copyright notice is up-to-date helps maintain the company's legal standing and reinforces the impression of an active and well-maintained website.

Aiden
Demo_Tests

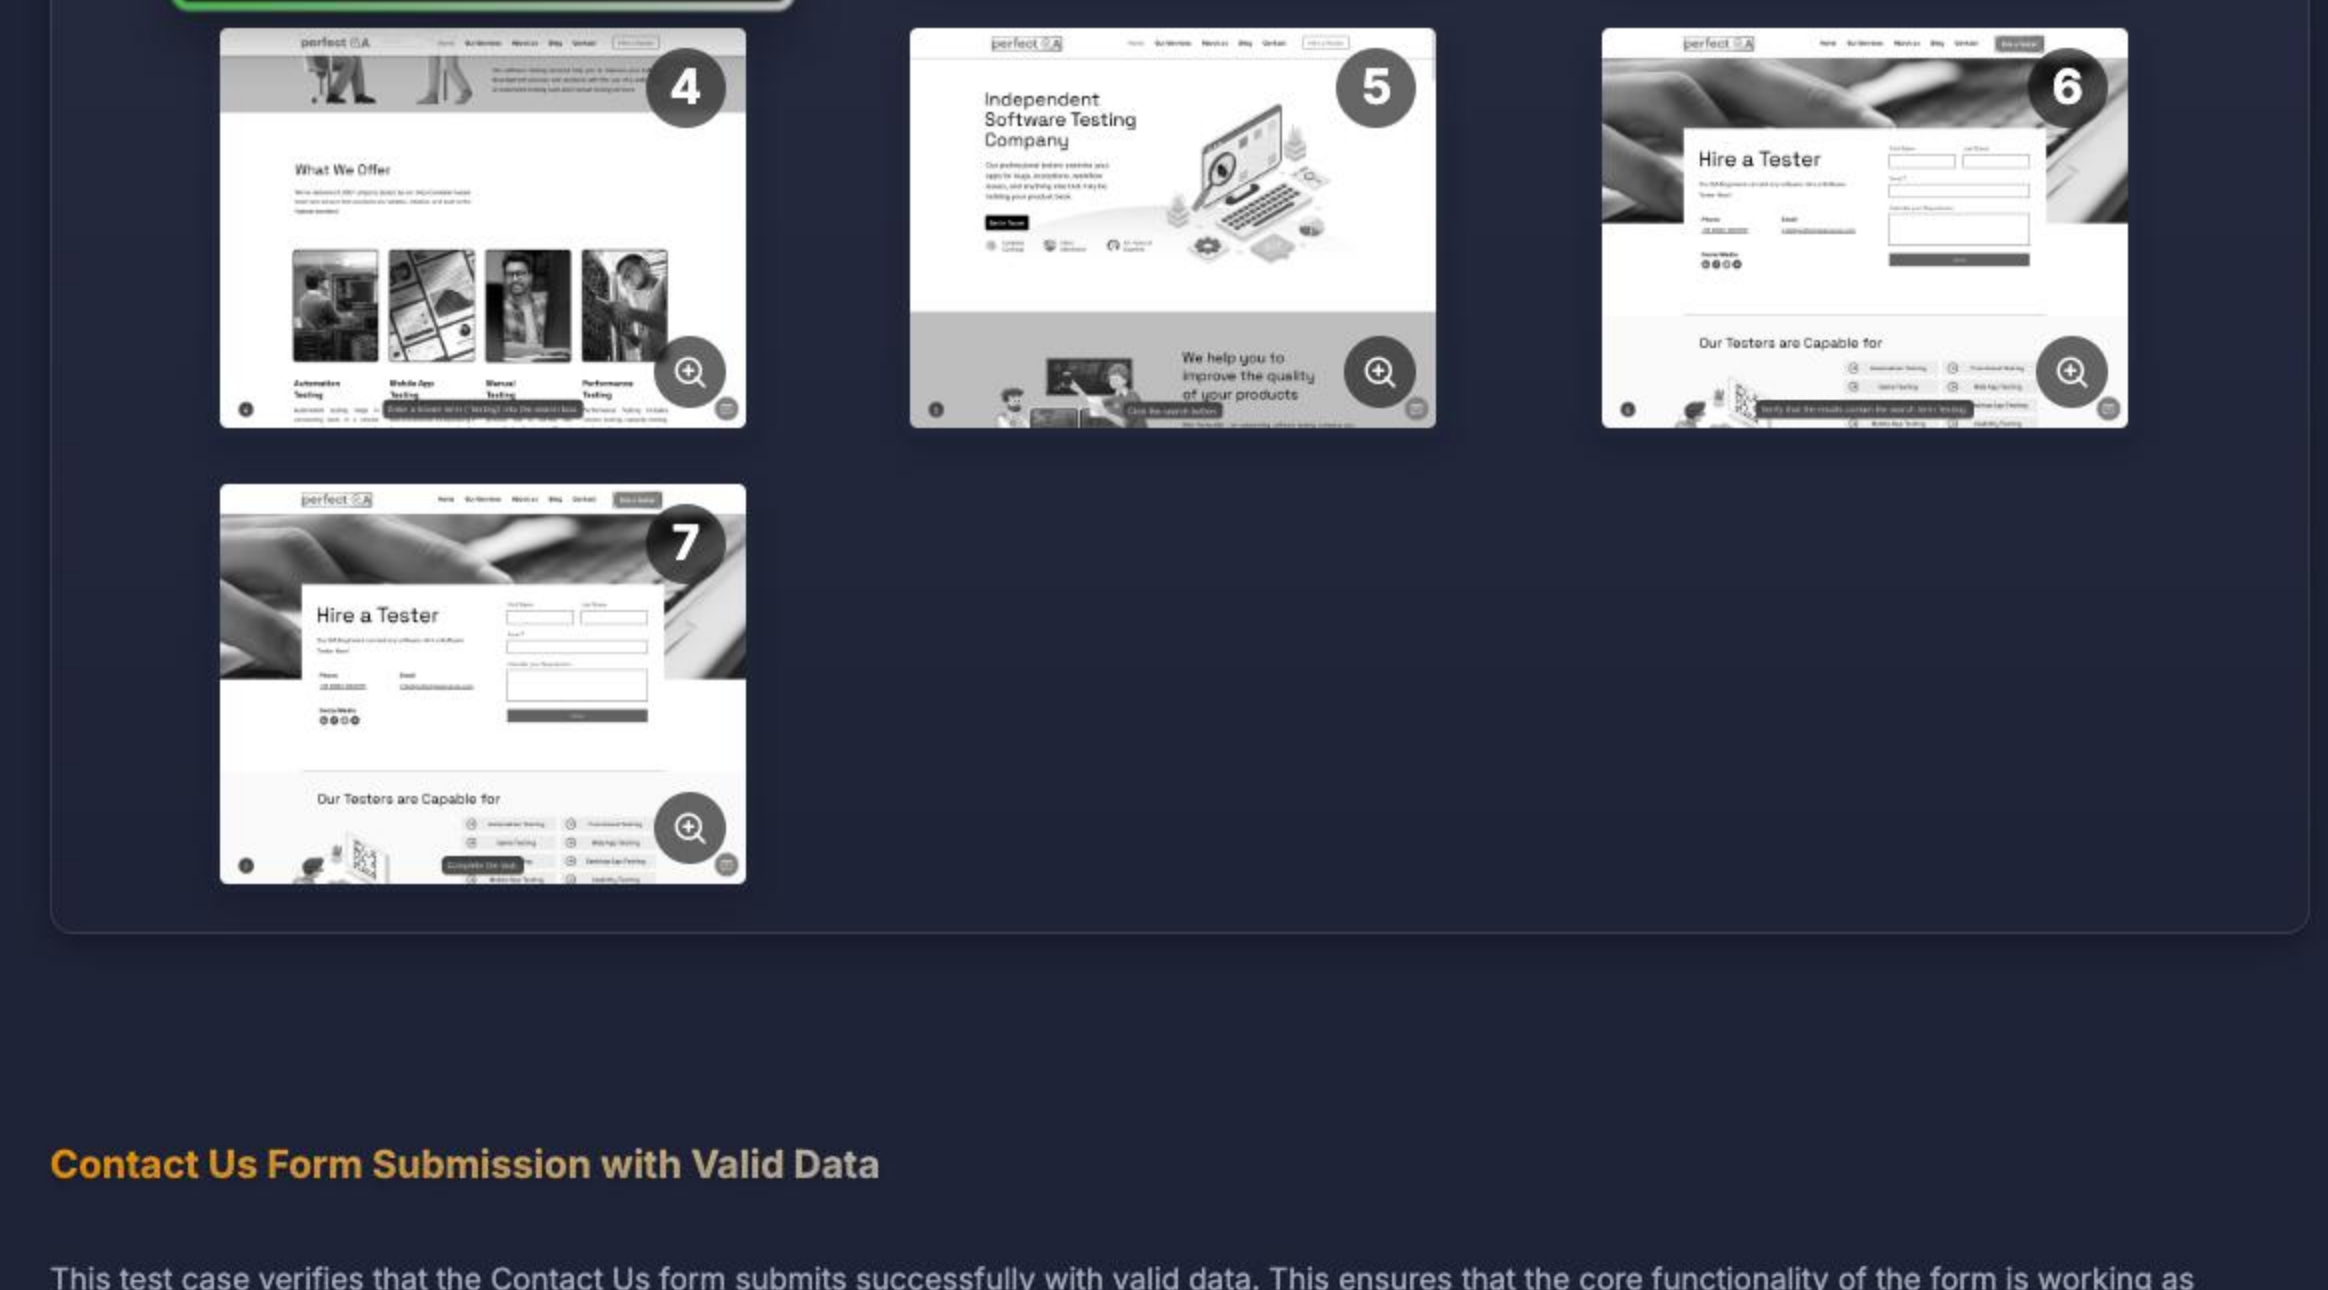

✓ **Navigate to Blog and back to Home**

This test validates basic navigation, ensuring the 'Blog' link leads to the correct page and that users can return to the homepage.

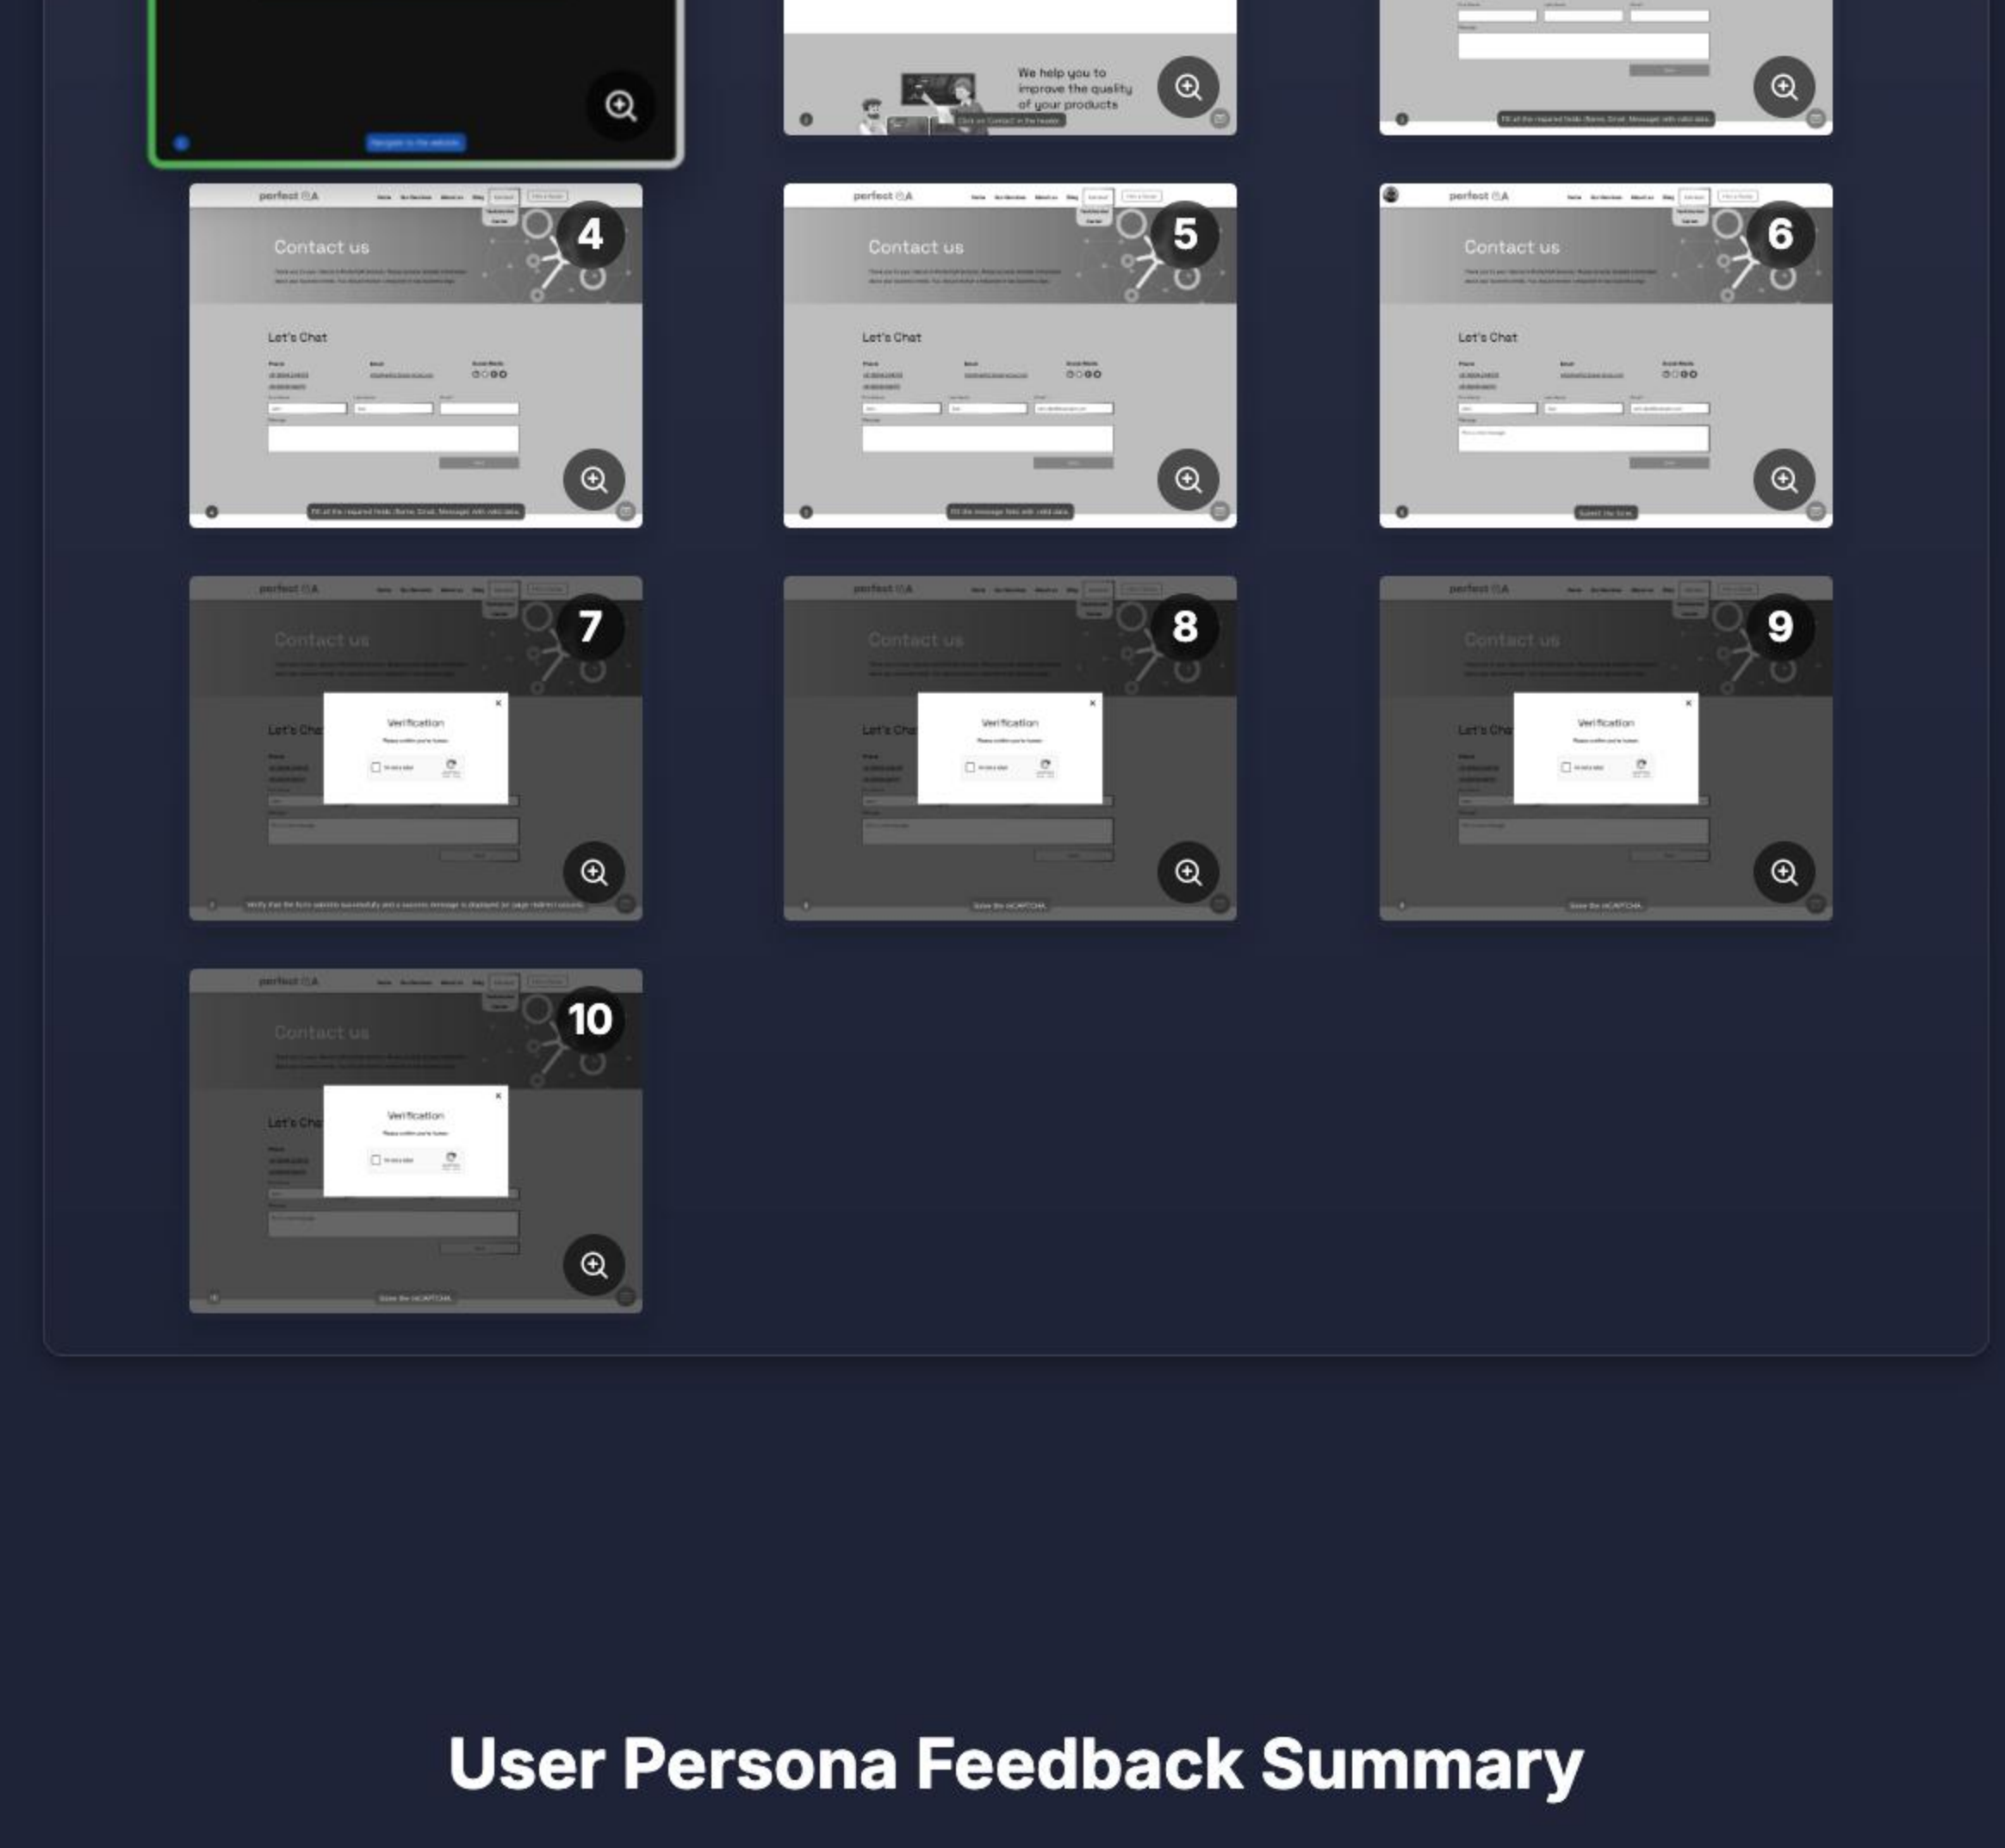

✓ **Search for valid term**

Verify that a search for existing term finds the term and related content.

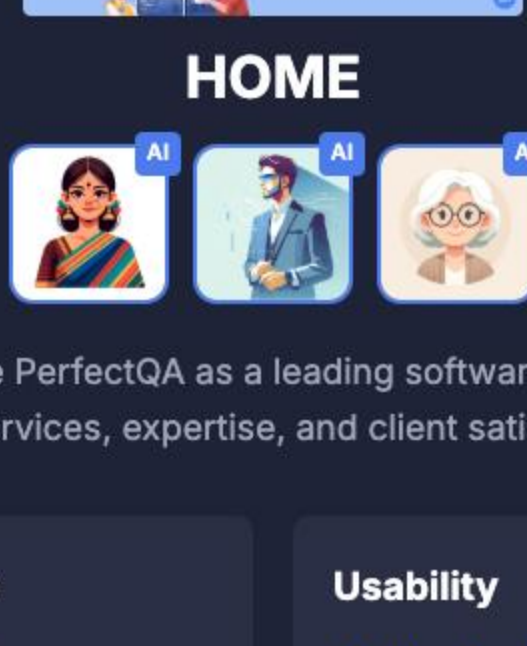

Contact Us Form Submission with Valid Data

This test case verifies that the Contact Us form submits successfully with valid data. This ensures that the core functionality of the form is working as expected.

User Persona Feedback Summary

HOME

The webpage aims to promote PerfectQA as a leading software testing company, highlighting their services, expertise, and client satisfaction.

| Overall Score | Visual Design | Usability | Content Quality |
|--|---|---|--|
| ★★★★★ | ★★★★★ | ★★★★★ | ★★★★★ |
| The website provides a clear overview of PerfectQA's services and expertise, with strong emphasis on client testimonials and a user-friendly design. However, improvements could be made in accessibility and competitive differentiation. | The illustrations are modern and professional, but maybe too generic, and not enough focus is being placed on accessibility to cater to disabled users. | The website is easy to navigate, with clear calls to action and a straightforward structure. Information is readily accessible, contributing to a seamless user experience. | The content is informative and highlights key aspects of the company's services. Client testimonials add credibility, and blog posts offer valuable insights. More detail on specific technologies and methodologies used could enhance the content. |

Individual User Persona Feedback

Priya Sharma, 32

Persona: Priya is a project manager at a mid-sized e-commerce company. She is responsible for ensuring the quality of their mobile app and website. She is looking for a reliable testing partner to help her team deliver high-quality products on time.

Overall Rating

★★★★★

This website provides a good overview of PerfectQA's services and expertise. The client testimonials are helpful, but more detailed case studies would be beneficial.

Actions Performed

- Browse services offered
- Read client testimonials

Suggestions

- Add case studies that highlight the benefits of using PerfectQA
- Include pricing information or a cost calculator
- Emphasize what makes PerfectQA unique in the market

David Lee, 45

Persona: David is a CTO at a startup focusing on AI-powered solutions. He is highly technical and deeply involved in the development process. He seeks a testing partner that can provide advanced automation and performance testing.

Overall Rating

★★★★★

The website highlights a good range of testing services, but I'd like to see more technical depth and specifics about their automation frameworks and performance testing methodologies.

Actions Performed

- Explore automation testing services
- Review tools and technologies used

Suggestions

- Add technical whitepapers and documentation.
- Showcase complex automation and performance testing case studies.
- Highlight AI-powered testing capabilities.

Susan Miller, 62

Persona: Susan is the owner of a small retail business. She needs a simple and affordable way to test her company's website for basic functionality and usability, ensuring that her customers can easily make purchases.

Overall Rating

★★★★★

The website seems professional, but I'm not sure if it's the right fit for my small business. It feels like it's geared towards larger companies with more complex needs.

Actions Performed

- Learn about manual testing services
- Review the 'About Us' section

Suggestions

- Create a section for small businesses with simplified explanations.
- Provide clear pricing information upfront.
- Offer a free consultation to assess needs.
