

AI Test Results from testers.ai

The 'SourceBase AI' app's home page reveals a mix of content and security issues. There are accessibility concerns such as insufficient color contrast in the footer, missing link purposes, and ambiguous link text. The presence of an outdated copyright notice and HTTP to HTTPS redirection inefficiency impact the user experience. Moreover, the app needs attention to GDPR compliance with a missing privacy policy and lack of explicit user consent mechanisms. A potential CSRF vulnerability on the 'Log In' link redirecting to an external authentication page is a major security concern.

Best Aspects

The app appears to have some functional navigation based on the presence of topics drop down (even if its missing on mobile) and explore links indicating some content available, suggesting a baseline functionality is present.

Areas for Improvement

The app suffers from a concerning number of accessibility, security, and privacy issues on its home page. Specifically, the potential CSRF vulnerability and lack of a privacy policy are critical failures.

Quality Summary

Detailed Analysis

The 'SourceBase AI' app's home page presents a mixed bag of issues, ranging from accessibility and usability to security and legal compliance. On the accessibility front, there are multiple instances of insufficient text and color contrast, particularly in the footer, which poses challenges for users with visual impairments. Additionally, several 'Explore' links lack explicit context, making it difficult for users to understand their purpose.

Beyond accessibility, there are concerns about data privacy and security. The absence of a privacy policy and a mechanism for explicit user consent is a significant oversight, particularly in light of GDPR regulations. Moreover, the potential for CSRF vulnerability in the 'Log In' link represents a serious security risk that needs to be addressed immediately.

Finally, there are minor issues such as an outdated copyright notice and inefficiency in HTTP to HTTPS redirection, which detract from the overall user experience and the app's perceived quality. Addressing these issues would improve the app's usability and demonstrate a commitment to user protection.

Key Suggestions

- Prioritize addressing the CSRF vulnerability to protect user accounts.
- Revamp the footer to meet WCAG accessibility guidelines, focusing on color contrast.
- Develop and implement a clear and comprehensive privacy policy.
- Implement explicit user consent mechanisms for data collection.
- Ensure all links have descriptive text to improve usability for all users.

Priority Improvements

1. Implement robust CSRF protection on the 'Log In' link by adding anti-CSRF tokens and validation.
2. Increase color contrast in the footer to meet WCAG guidelines (minimum contrast ratio of 4.5:1 for normal text and 3:1 for large text).
3. Add explicit link purpose descriptions to all 'Explore' links to improve accessibility and usability.
4. Implement a clear and concise privacy policy, ensuring it is easily accessible from the home page.
5. Implement an explicit user consent mechanism for data collection, adhering to GDPR requirements.
6. Update the copyright notice in the footer to reflect the current year.

Outdated Copyright Notice

Priority: 7/10 Confidence: 9/10

Copyright

Why is this a bug?

The copyright notice at the bottom of the page indicates the year 2024. The current year is 2025, making the copyright notice outdated and potentially misleading.

Suggested Fix

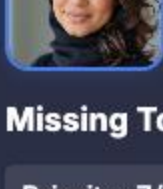

Update the copyright notice to reflect the current year, 2025. The notice should read '© 2025 Bongo Media. All rights reserved.'

Why Fix This?

An outdated copyright notice can undermine the credibility of the website and raise questions about its maintenance. It is important to keep legal notices up-to-date to accurately reflect the ownership and rights associated with the content.

Missing Topics Dropdown in Mobile View

Priority: 7/10 Confidence: 9/10

general navigation

Why is this a bug?

In the desktop view, a 'Topics' dropdown menu is present in the navigation bar. This dropdown is completely missing in the mobile view. Users on mobile devices have no obvious way to access the topics that were available to desktop users, which negatively impacts the usability of the site and discovery of additional content. The hamburger menu only provides 'Log In'.

Suggested Fix

Implement the 'Topics' dropdown menu within the mobile navigation (e.g., within the hamburger menu) or integrate it into the page layout in a mobile-friendly manner.

Why Fix This?

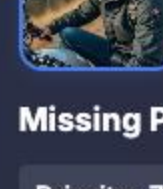

Restoring the 'Topics' menu ensures mobile users have full access to all site content and improves the user experience.

Missing Privacy Policy

Priority: 7/10 Confidence: 9/10

GDPR General Privacy

Why is this a bug?

The webpage lacks a visible and easily accessible privacy policy. GDPR requires organizations to provide users with clear and comprehensive information about how their personal data is collected, used, and protected. The absence of a privacy policy indicates non-compliance.

Suggested Fix

Create a comprehensive privacy policy that outlines data collection practices, usage, and protection measures. Include a clear and prominent link to the privacy policy in the website footer and other relevant locations.

Why Fix This?

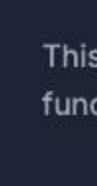

Failure to provide a privacy policy violates GDPR and can result in significant fines and reputational damage.

Aiden
Demo_Tests

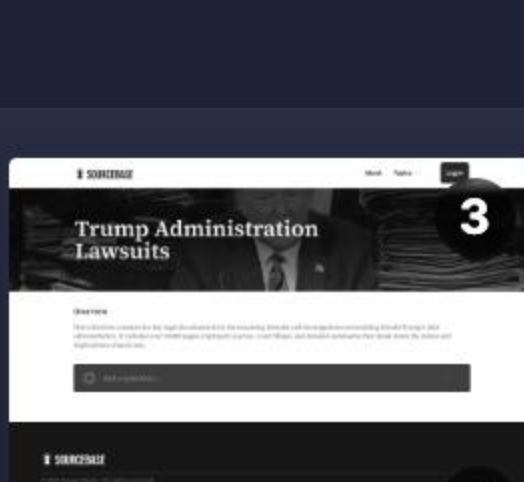

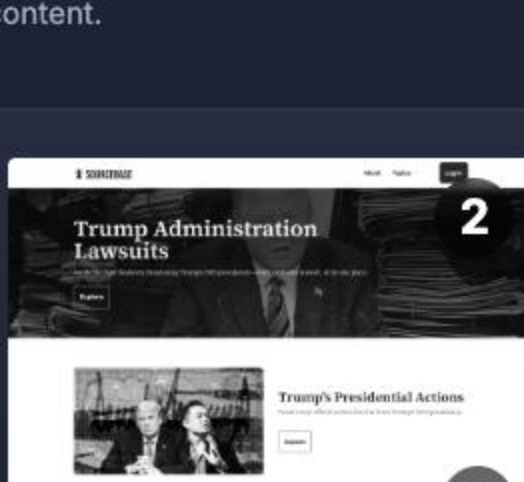

✓ Navigate to Project 2025 explore link

This test is to check if the 'Project 2025' explore link navigates to the correct page, it is important to ensure that the explore links on the home page is functional, if not it will be difficult to see the content.

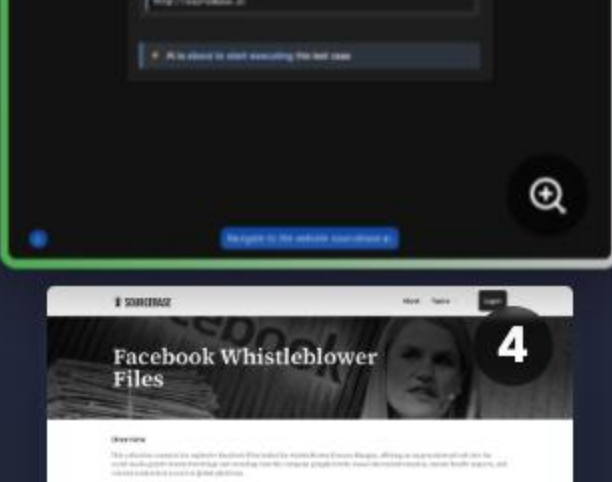

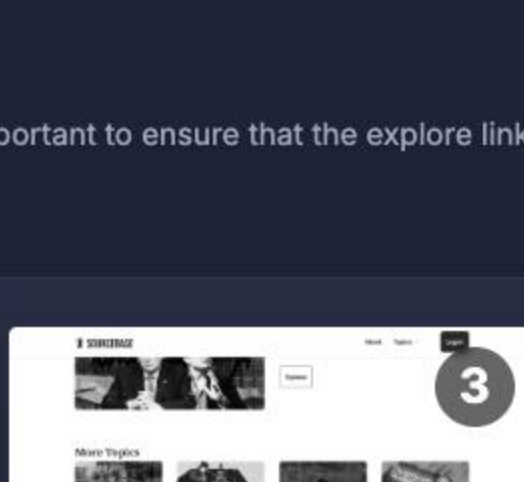

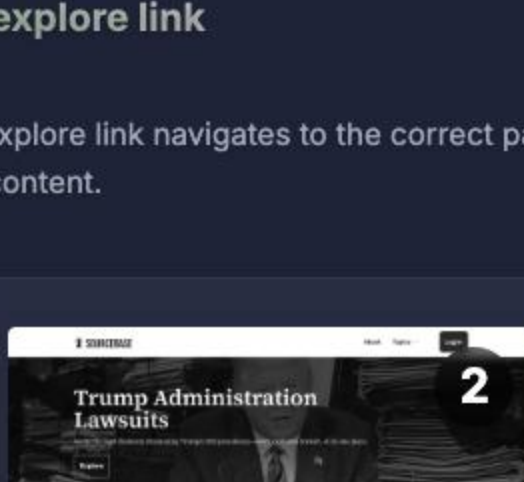

✓ Navigate to Trump Administration Lawsuits explore link

This test is to check if the 'Trump Administration Lawsuits' explore link navigates to the correct page, it is important to ensure that the explore links on the home page is functional, if not it will be difficult to see the content.

✓ Navigate to Facebook Whistleblower Files explore link

This test is to check if the 'Facebook Whistleblower Files' explore link navigates to the correct page, it is important to ensure that the explore links on the home page is functional, if not it will be difficult to see the content.

User Persona Feedback Summary

HOME

The webpage serves as a gateway to Sourcebase.ai's platform, providing access to curated source material on various topics, primarily focusing on legal and political matters. It aims to attract users to explore, discover, and research these topics using AI-powered tools.

Overall Score

The website presents a compelling gateway to diverse research topics. However, usability could be improved with a more intuitive navigation and search functionality. The content is engaging and feature-rich, but accessibility needs enhancement for a broader audience.

Visual Design

I appreciate the use of contrasting visuals and images that are relevant. It makes it easy to scan and get a sense of what each section is about.

Usability

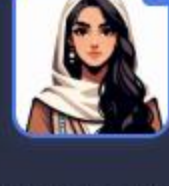

Finding specific information isn't as straightforward as it could be. A more robust search and filtering system would significantly improve the user experience.

Content Quality

The content is fascinating and well-curated, offering valuable insights into complex issues. The summaries are effective in piquing my interest.

Individual User Persona Feedback

Ava Sharma, 24

Persona:Ava is a recent law school graduate working as a junior associate at a law firm. She's passionate about legal research and social justice. She is proficient with many technologies and devices.

Overall Rating

I am pretty impressed with Sourcebase! The summaries are very intriguing. The site needs more information on the AI itself and it's capabilities.

Actions Performed

- Explore Trump Administration Lawsuits
- Create and query her own topics on Sourcebase

Suggestions

- Add a demo or tutorial of the AI platform
- Implement advanced search filters for legal areas and jurisdictions
- Include a glossary of legal terms

Ethan Cole, 35

Persona:Ethan is a political science professor at a university. He specializes in American politics and legal studies. He frequently uses online resources for research and teaching.

Overall Rating

The site looks pretty good, but as an academic, I'm very skeptical of sources. I need assurance that the data and AI used is legal before I buy in.

Actions Performed

- Explore Project 2025
- Explore Trump's Presidential Actions

Suggestions

- Add academic citation tools for easy use in papers
- Implement accessibility options for students with disabilities
- Add a way to easily compare sources to each other.
- Improve search within the content
